MAIN LINE FERTILITY

Patient Responsibilities/Consents

Patient Name: _____

Patient D.O.B.: _____

Financial Responsibility:

Patients are required to pay any non-covered services on the day of service in full. Cash, check, Visa, MasterCard, and American Express are all acceptable forms of payment.

PATIENTS WITH INSURANCE COVERAGE

We will gladly discuss your proposed treatment and answer any questions relating to your insurance. We must, however, emphasize that as medical care providers, our relationship is with you, not your insurance company. It is your responsibility to be aware of your insurance coverage. While Main Line Fertility is responsible for timely filing of your insurance claims, all charges are your responsibility from the date services are rendered and **YOU ARE RESPONSIBLE FOR RESOLVING ANY PROBLEMS WITH YOUR INSURANCE COMPANY.**

Portions of the bill that may not be paid by the insurance company are to be paid by the patient, i.e. **COINSURANCE, DEDUCTIBLES OR BALANCES FOR NON-COVERED SERVICES**. If your insurance company has not paid your claim, you will be required to pay services rendered and any insurance benefit later received will be credited and you will be refunded.

Furthermore, it is the patient's responsibility to obtain any referrals or authorizations required by your insurance plan(s) prior to the appointment from either the Primary Care Physician or the referral/authorization hotline determined by your insurance policy. If the appropriate referral or authorization is not obtained, you will be responsible for payment of services in full if the insurance company refuses payment on any submitted claim.

PAYMENT OF BALANCE

If your insurance company sends you a check for services rendered by Main Line Fertility and Reproductive Medicine, LTD or Main Line Fertility Center, Inc., you agree to endorse and forward that check to the address below. You also agree to be financially responsible and to promptly pay any balance for professional services not covered or paid in full by your insurance company.

MEDICARE AND MEDICAID

If you have Medicare or Medicaid as a primary or secondary insurance, please be aware that we are a non-par opt-out provider. Therefore, if you choose to be seen by our physicians, you will have to pay the full amount of charges for your care on the date of service.

OUT OF NETWORK COVERAGE

If our facility or physicians are out of network with your insurance plan and you choose to be seen for medical testing/treatment, you are accepting full responsibility of any patient balance which may accumulate as a result and understand that this is not appealable thru your insurance carrier. Furthermore, if you are referred by our physicians or staff to an outside facility for lab work or other testing/treatment, it is your responsibility to verify if the facility participates with your insurance carrier and any and all fees that result from said testing are the patient responsibility and are not appealable thru your insurance carrier.

ADDITIONAL TERMS

Checks returned by your bank are subject to a $50 processing charge. Accounts greater than 60 days past due will be subject to a finance charge at the rate of 1.5% per month. If your account is referred for collection, you will be responsible for the outstanding balance, collection costs, court costs, and attorney's fees. Furthermore, you will not be permitted to schedule further appointments until all collection costs are paid in full.

AUTHORIZATION TO RELEASE INFORMATION

You also authorize the release of any information pertinent to your case to any insurance company, adjuster or attorney involved in your case.

I have read and understand the financial policy of the office and understand that a photocopy of this assignment shall be considered as effective and valid as the original.

Use of E-Mail:

Risk of Using Email: Transmitting patient information by E-mail has a number of risks that patients should consider before using E-mail. These include, but are not limited to, the following risks:

a. It is possible that the confidentiality of such communications may be breached by a third party.
b. E-mail can be circulated, forwarded, stored electronically and on paper, and broadcast to unintended recipients.
c. E-mail senders can easily misaddress an E-mail.
d. E-mail is easier to falsify than handwritten or signed documents.
e. Backup copies of E-mail may exist even after the sender or the recipient has deleted his or her copy.
f. Employers and on-line services have a right to inspect E-mail transmitted through their systems.
g. E-mail can be intercepted, altered, forwarded, or used without authorization or detection.
h. E-mail can be used to introduce viruses into computer systems.
i. The server could go down and E-mail would not be received until the server is back on-line.
j. Email can be used as evidence in court.

Conditions for the Use of E-mail: Main Line Fertility cannot guarantee but will use reasonable means to maintain security and confidentiality of E-mail information sent and received. Main Line Fertility and its employees, owners, or agents must acknowledge and consent to the following conditions:

a. E-mail is not appropriate for urgent or emergency situations. Main Line Fertility cannot guarantee that any particular E-mail will be read and responded to within any particular period of time.
b. Emails to or from the patient concerning treatment may be printed in full and made part of patient's medical record or placed in any electronic file. Because they are part of the medical record, authorized individuals will have access to the medical record/email.
c. Main Line Fertility will not forward patient identifiable E-mails outside of Main Line Fertility without the patient's prior written consent, except as authorized or required by law.
d. The patient should not use E-mail for communication regarding sensitive medical information, such as information regarding sexually transmitted diseases, AIDS/HIV, mental health, or substance abuse. Main Line Fertility is not responsible for breaches of confidentiality caused by the patient or any third party.
e. It is the patient's responsibility to follow up and/or schedule an appointment if warranted.
f. This consent will remain in effect until terminated in writing by either the patient or Main Line Fertility.
g. In the event that the patient does not comply with the conditions herein, Main Line Fertility may terminate patient's privilege to communicate by E-mail with Main Line Fertility.

Instructions: To communicate by E-mail, the patient shall:

a. Avoid use of his/her employer's computer.
b. Put the patient's name in the body of the E-mail.
c. Key in the topic (e.g., medical questions, billing question) in the subject line.
d. Inform Main Line Fertility of changes in his/her E-mail address.
e. Acknowledge any E-mail received from Main Line Fertility.
f. Take precautions to preserve the confidentiality of E-mail.
g. Protect his/her password or other means to E-mail.

Patient Acknowledgement and Agreement: I acknowledge that I have read and fully understand this consent form. I understand the risks associated with the communication of E-mail and consents to the condition and instructions outlined, as well as any other instructions that Main Line Fertility may impose to communicate with patient by E-mail. If I have any questions, I may inquire with Main Line Fertility.

I, for myself, my heirs, executors, administrators and assigns, fully and forever release and discharge Main Line Fertility and its affiliates, shareholders, officers, directors, physicians, agents and employees, from and against any and all losses, claims, and liabilities arising out of or connected with the use of such E-mail.

Zika Virus:

The Zika Virus is spread mostly by the bite of an infected *Aedes* species mosquito (*Ae. aegypti* and *Ae. albopictus*). These mosquitoes bite during the day and night. Many people infected with Zika virus won't have symptoms or will only have mild symptoms. The most common symptoms of Zika are: Fever, rash, joint pain, red eyes, muscle pain and/or headache. Symptoms can last for several days to a week. People usually don't get sick enough to go to the hospital, and they very rarely die of Zika.

- Zika can be passed from a pregnant woman to her fetus. Infection during pregnancy can cause certain birth defects.
- There is no vaccine or medicine for Zika.
- Local mosquito-borne Zika virus transmission has been reported in the continental United States

Per the Center for Disease Control (CDC) women with possible Zika virus exposure are recommended to wait to get pregnant until at least 8 weeks after symptom onset (if symptomatic) or last possible Zika virus exposure or travel to possible Zika infested area (if asymptomatic).

The CDC now recommends that all men with possible Zika virus exposure who are considering attempting pregnancy with their partner wait to get pregnant until at least 6 months after symptom onset (if symptomatic) or last possible Zika virus exposure (if asymptomatic).

The CDC recommends that if you are attempting pregnancy you check the CDC website for areas with Zika risk, talk to your doctor or other healthcare provider before traveling to areas with Zika risk, taking steps to plan for travel, and consider avoiding nonessential travel to areas with a CDC Zika travel notice.

There are still many unknowns about the Zika virus and its transmission. As updates become available Main Line Fertility will pass along such information and recommendations.

I have read this information, have had the opportunity to ask questions, have decided to accept the above risks known and unknown, and wish to proceed with fertility treatment to attempt pregnancy.
